HELP ME MARKETING

SEO GROWTH OS VISUAL GUIDE

SEO Growth OS

Find the checks your business needs.

Explore the website and search checks I can help automate, the recommendations they produce and where your review is needed.

Where should you start?

WHAT YOU ARE EXPERIENCING	START HERE
Important pages rarely appear in search	**Search performance and indexing checks**
People visit but few enquire	**Conversion and measurement review**
Unsure whether AI tools mention your business	**AI visibility checks**
Problems return after website updates	**Change verification and monitoring**
SEO findings pile up without action	**Prioritised briefs and progress tracking**

Six areas

Website health
Access, links, speed and markup.

Search performance
Visibility, intent and opportunities.

Content
Page basics, links and briefs.

AI visibility
Answers, mentions and citations.

Measurement
Enquiries, events and data quality.

Progress
Priorities, verification and records.

How to read the labels

DRAFT + REVIEW	Prepares suggestions for a person to assess.
HUMAN REVIEW	Needs judgment or validation.

Checks depend on your website, connected tools and data. Automation is configured during setup, and you approve changes before anything is published.

WEBSITE HEALTH & SEARCH PERFORMANCE

Can people and search engines reach the right pages?

Access, indexing & sitemaps

Rechecks page access, indexing directives, canonical URLs and sitemap inclusion.

You receive: Affected pages, issues and recommended next steps.

Links, redirects & website updates

Finds broken links and redirect chains, and checks for problems after updates.

You receive: Affected links and changes needing attention.

Performance & media

DRAFT + REVIEW

Checks page speed and missing image descriptions. Draft descriptions are reviewed for usefulness.

You receive: Performance findings and images to improve.

Structured data

HUMAN REVIEW

Validates markup and flags errors. A person checks that it accurately describes your business.

You receive: Page-specific findings and draft corrections.

Search performance & opportunities

HUMAN REVIEW

Tracks page and query performance. Reviews search intent, competitors and backlinks.

You receive: Pages and opportunities to investigate, with supporting evidence.

Local, store & international

ONLY WHERE IT APPLIES

Checks relevant local profiles, product listings and language or country versions.

You receive: Location observations, listing issues and affected pages.

CONTENT & AI VISIBILITY

Do your pages answer the questions customers ask?

Page basics & content freshness

HUMAN REVIEW

Rechecks titles, descriptions and headings. A person reviews accuracy, unanswered customer questions and outdated content.

You receive: Page-specific issues and sections to update, with reasons.

Internal linking

DRAFT + REVIEW

Reviews how priority pages connect and suggests relevant links. You review the relevance and wording.

You receive: Source page, destination and suggested link wording.

Content briefs

DRAFT + REVIEW

Drafts recommendations from the page's purpose and available evidence. You review and approve the proposed changes.

You receive: A brief explaining what to change, why and how to verify it.

Location & service pages at scale

HUMAN REVIEW OPTIONAL

Reviews templated pages for useful differences, factual consistency, internal links and indexing directives.

You receive: Recommendations to improve, merge or manage the indexing of specific pages.

Answer suitability

HUMAN REVIEW

Reviews whether pages clearly answer customer questions and support business claims with accurate information.

You receive: Specific sections to clarify or strengthen.

AI mentions & citations

HUMAN REVIEW

Records mentions and citations for agreed questions. Supported Google AI checks can repeat; other responses and accuracy need review.

You receive: The question, platform, date, mentions, citations and accuracy concerns.

AI answers vary; observations are recorded with their date and context.

MEASUREMENT & PROGRESS

Are enquiries being measured, and is the work moving forward?

Conversion & enquiry journey

HUMAN REVIEW

Reviews offer clarity, calls to action, forms and mobile usability. Form submissions require your permission.

You receive: Observed barriers, recommendations and test ideas.

Events & consent

HUMAN REVIEW

Reviews whether customer actions trigger the expected events and how tracking responds to consent choices. Tests require approval.

You receive: Observed tracking behaviour and gaps to address.

Real enquiries & data quality

HUMAN REVIEW

Reviews outcome definitions, lead records, test traffic, filters and reporting periods to identify misleading figures.

You receive: Discrepancies and an explanation of which figures are reliable.

Priorities & draft actions

DRAFT + REVIEW

Combines related findings and drafts priorities based on evidence, opportunity, severity, risk, effort and dependencies. You decide what proceeds.

You receive: What to address now, investigate, test or leave unchanged.

Change verification & monitoring

Rechecks approved changes and flags recurring problems. Implementation status and business impact are assessed separately.

You receive: Evidence showing what is live, partly live, outstanding or unverified.

Change record & recurring summary

DRAFT + REVIEW

Records findings, decisions and completed work, then drafts an update for your review.

You receive: A concise summary of progress, open issues and approvals needed.

HOW IT WORKS & NEXT STEP

From a finding to a clear next action

1 **Brief & access** → 2 **Collect evidence** → 3 **Run the checks** → 4 **Diagnose & prioritise** → 5 **Draft & approve** → 6 **Verify & monitor**

The stages can span more than one run. Each run builds on the previous record, and not every finding leads to a change in the same run.

AN EXAMPLE FROM MY OWN WEBSITE

Process example, recorded 10 November 2026

A run flagged a commercial page with limited search visibility. It checked indexing and internal links, then prepared a brief naming the pages to edit and the proposed link wording.

The proposed change required approval. Confirming implementation and assessing later search performance are separate steps.

What you receive

- A clear report with findings and priorities.
- Draft briefs or recommendations for review.
- A dated record of decisions and changes.
- A way to verify each recommended change.

What setup needs

- Your website and priority outcomes.
- Access to the agreed data sources.
- Selected checks, a tested schedule and a review process.

Some checks need paid tools or an available signed-in browser; requirements are confirmed during setup.
